SOME MATTERS OF BUSINESS

THIS list, issued for our local trade, will help you in making a selection best adapted to your needs.

While we do not do landscape planting, we will, at any time, give you advice as to proper arrangement and planting, a service which we gladly render without charge.

Compare our stock with others and you will find it equal to the best offered by any nursery; compare our prices with those of our competitors and you will see that you can save half your money by buying of us.

We ship by freight, express and parcels post, or delivery of stock direct to your residence may be had by special arrangement at time of purchase.

All orders will have the personal attention of Mr. Cassel or a competent assistant, thoroughly trained in the best nursery methods.

WE ARE GLAD TO HAVE YOU VISIT US
AND SELECT YOUR STOCK WITHOUT ADDI-
TIONAL CHARGE—A PRIVILEGE NOT ALWAYS
EXTENDED ELSEWHERE.

We want a share of your business and will do our utmost to deserve it. Many customers have been with us for years. Each year we get new customers—will you be one of them?

GUARANTEE

As liberal as can be made. We expect a fair price for what we have to sell but we want our customers to get their money's worth.

If stock is not represented or what you have a right to expect, return it to us at once and the money you have paid us, together with transportation charges, will be refunded to you. Fair, isn't it?

Our grounds are open to visitors every day in the year, and while we would like to have one day in the week for rest, yet if you visit us on Sunday you will receive the same courteous treatment accorded visitors on other days of the week.

Evergreen Shrubs

There is a luxuriance about Broad-leaved Evergreens that is very hard to describe, but which everyone feels and admires when they behold them. Their dark green, glossy leaves are always attractive, and, as foundation plantings about the house, they impart a feeling of warmth in winter and coolness in summer.

There are no native plants more beautiful nor more useful for landscape planting than Rhododendrons, Azaleas, Kalmias and other plants belonging to this class.

No comment need be made as to their beauty of flower and foliage. The concern is, to get dependable plants at a reasonable price.

Enthusiastic love for our work and the knowledge gained from more than forty years experience in actual outdoor work in the nursery has taught us methods best adapted to the planting and care, not only of Rhododendrons, etc., but of most stock found in a well-stocked nursery.

Some years ago we began the planting of Rhododendrons in our nursery here and we are gradually working up a stock of plants equal to any in this country. Our collectors in the localities where these plants grow naturally, are sending us new material each season—which we plant in our nursery and are growing under ideal conditions of soil and care.

Planting and Cultural Directions

The roots of these plants grow near the surface seeking acidity and moisture. They must have acid soil, as soil with a neutral or alkaline reaction has toxic properties that will kill the plants in a year or two.

A good soil to use can usually be found in the forest—the loose dark-colored soil just under the fallen leaves usually contains the elements necessary to start the plants off properly the first year. Never let the ground dry out during the summer as this will surely destroy your plants.

Humus in some form is beneficial. Imported Peat Moss mixed in proportion of one-fourth Peat Moss to three-fourths leaf mold is an ideal mixture for new plantings. The Peat Moss may be obtained of us.

Tannic acid or Sulphate of Aluminum may be used to render your soil acid—but application of these chemicals should be under the supervision of one who thoroughly understands his business or serious damage may result. Usually mulching each fall with leaves will help retain the proper acidity of the soil.

We are ready at all times to give our customers cultural directions and advice. All Rhododendrons, Kalmias, Leucothe Catesbæi, Pieris Floribundi, etc., are dug with ball of earth securely bound to the plant with burlap, and with favorable conditions are reasonably sure to thrive when planted.

Rhododendrons

Prices include careful balling and burlapping.

Selections may be made from this stock that are well budded, and will bloom the first year.

Rhododendron Catawbiense

RHODODENDRON CATAWBIENSE.—One of the most beautiful of our hardy, native flowering shrubs. Reddish purple flowers, 1½ inches across, borne in large trusses, in late May. The bright green foliage is glaucous beneath and clusters at the end of the branches. Thrives in sun and shade.

1½ to 2 feet clumps	\$2.50 each
2 to 2½ feet clumps	3.00 each
2½ to 3 feet clumps	4.00 each
3 to 3½ feet clumps	5.00 each

RHODODENDRON CATAWBIENSE COMPACTA.—For positions exposed to sun and wind, these dwarfed forms are superb. The plants are more woody and the dark green foliage smaller than in the preceding variety.

15 to 18 inch clumps	\$3.50 each
----------------------------	-------------

RHODODENDRON CAROLINIANUM.—The most beautiful of the native Rhododendrons, growing 6 to 8 feet high. The plants are well clothed with dark green leaves, rusty below, and produce, in early May, a wealth of unusually large, pale, rose-pink flowers in good-sized clusters. Without a doubt one of the best of all broad-leaved evergreens, and thrives in full sun or partial shade.

8 to 10 inch clumps	\$1.00 each
10 to 12 inch clumps	1.50 each
12 to 15 inch clumps	2.75 each
18 to 24 inch clumps	3.50 each

RHODODENDRON MAXIMUM.—A hardy variety, of magnificent size, making it a wonderful plant for mass effect.

This is the variety that is used extensively in park developments and on large estates. It is perfectly hardy at our nursery here, and we consider it the most valuable broad-leaved evergreen for planting in Northern Ohio. It thrives well in a dense shade, and may thus be planted in locations where few other plants will succeed. The luxuriant growth of dark green, narrow leaves, 6 to 12 inches long, gives a delightful atmosphere. The light pink flowers, 1½ to 2 inches broad, are borne in large clusters in great abundance in June.

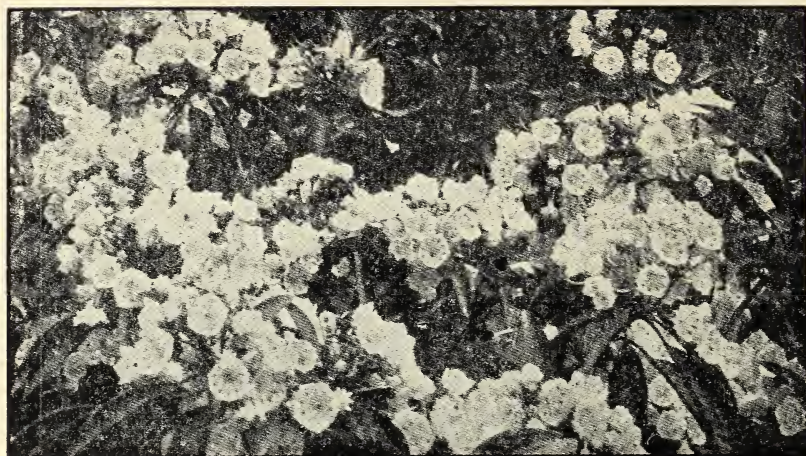

Rhododendron Maximum

1½ to 2	foot clumps	\$2.00 each
2	to 2½	foot clumps 2.50 each
2½ to 3	foot clumps	3.00 each
3	to 4	foot clumps 4.00 each
4	to 5	foot clumps 5.00 each

KALMIA LATIFOLIA.—None of our native broad-leaved evergreens surpass in beauty this representative of the Heath family. Its white flowers, delicately tinged with pink, come forth in great profusion during the spring months, and, when masses are planted in the open sun on the hillside, can be seen for miles around. Colonies of this beautiful evergreen shrub when once established increase in beauty from year to year, eventually developing into grand old landmarks.

1	to 1½	foot clumps	\$1.50 each
1½	to 2	foot clumps	2.00 each
2	to 2½	foot clumps	2.50 each
2½	to 3	foot clumps	3.00 each
3	to 4	foot clumps	4.00 each

Kalmia Latifolia

LEUCOTHÆ CATESBÆI.—This drooping evergreen shrub produces an abundance of delicate white flowers in the spring. It is especially useful for planting along streams, in the meadow, or at the edge of a rhododendron bed. When planted as an individual specimen it develops into a very bushy, compact plant. In the autumn the foliage turns a deep bronze, giving it a distinctive appearance.

1 to 1½ feet clumps	\$1.50 each
1½ to 2 feet clumps	2.00 each

Leucothoe Catesbæi

PIERIS FLORIBUNDA.—The rarest and one of the most desirable American evergreen. Low, compact plants, with shiny dark green foliage that is surmounted in late April with dense, pyramidal spikes of lily-of-the-valley-like flowers. The flower-buds appear in early fall, giving the appearance of bloom throughout the winter.

1 to 1½ foot clumps	\$1.50 each
---------------------------	-------------

LEIOPHYLLUM BUXIFOLIUM.—Box Sand Myrtle. A most desirable dwarf evergreen shrub for ground-covers, edging, window-boxes, and rockeries. The foliage is similar too, but smaller than, boxwood. Dense corymbs of white flowers are so abundantly borne in May as to almost hide the foliage.

1 foot clumps	\$1.00 each
---------------------	-------------

Deciduous Flowering Shrubs

For varieties and sizes not listed in this catalogue, please ask for prices, stating quantities, sizes, and varieties desired.

Azalea Arborescens

flowered Azaleas, and rare in cultivation. The beautiful rose-tinted flowers open in late May, after the leaves begin to unfold and are fragrant. Makes formal, symmetrical plants. The foliage assumes beautiful red and yellow tones in the fall.

1 foot clumps	\$1.50 each
1½ foot clumps	2.00 each

AZALEA CALENDULACEA.—Flame Azalea. Of all the Azaleas hardy in the North, none equals this one in beauty. The colorful, 2-inch, nearly odorless flowers are contrasted with the well-grown leaves, making it superior to all the others, with the possible exception of Vaseyi which blooms before the leaves appear. The color varies from yellow-red to orange-red, flame-red, and cream.

1½ foot clumps	\$1.50 each
2 foot clumps	2.00 each

AZALEA VISCOSA.—Swamp Azalea. The latest Azalea to bloom. The fragrant white or delicate light pink flowers appear in July. The shiny green foliage turns to bronze in the fall, and is the last Azalea to lose its leaves.

1½ foot clumps	\$1.50 each
----------------------	-------------

AZALEA NUDIFLORA.—Pinxter Bloom. The fragrant, rose-pink or white flowers open in great numbers before or with the unfolding leaves, a few days before *A. rosea*. It is a very attractive species, sharing the glory of the garden with *A. rosea*. Fall foliage very attractive shades of orange and bronze.

1 foot clumps	\$1.50 each
1½ foot clumps	2.00 each

AZALEA MOLLIS.—Of Japanese origin, this variety has become very popular. Its bright salmon colored flowers appear in early spring before the leaves unfold.

1 foot clumps	\$1.50 each
---------------------	-------------

Well grown, thrifty, blooming-size shrubs that will give satisfaction. We list only the popular varieties. The Azalea is really a *Rhododendron* and has the same soil requirements—all of the hardy varieties of Azaleas drop their leaves in the fall.

AZALEA ARBORESCENS — Sweet Azalea. Exceedingly spicy and fragrant white flowers borne in June after the foliage, which in late autumn turns to a beautiful striking shade of red, orange and bronze.

1½ foot clumps	\$1.50 each
----------------------	-------------

AZALEA CANESCENS.—Piedmont Azalea. The most beautiful of all the rose-colored or pink-

- ALMOND.**—Early spring flowering shrubs, in full bloom before the leaves appear, with beautiful double flowers of rose or white.
Double White or Double Pink, 1½ foot 50c each
- ALTHEA.**—Blooms in August and September. Double crimson, double pink.
2 to 3 foot 50c each
- BUSH HONEYSUCKLE.**—White and pink flowers in May, followed by red berries.
2 to 3 foot 50c each
- BUDDLEIA MAGNIFICA.**—Butterfly Shrub. The hardiest for all sections when used outdoors as a permanent shrub. Flower spikes 10 inches in length by 3 in diameter are not unusual. Color, deep violet-rose, with a pronounced orange center.
Strong 2-year 50c each
- CALYCANTHUS.**—(Carolina All-spice.) A unique shrub growing upright to 6 feet, clothing its straight strong, reddish brown shoots with large glossy leaves, from the axils of which spring odd, double, spicy fragrant flowers of chocolate-red.
12 to 18 inches 50c each
- CLETHRA ALNIFOLIA.**—(Sweet Pepper Bush.) A handsome little shrub, delightfully fragrant in August and September when covered with long, showy wands of creamy white flowers.
18 inches 50c each
- CORNUS ALTERNIFOLIA.**—A native Dogwood with bright crimson branches. Flowers creamy-white, followed by bright sky-blue berries.
3 to 4 feet 50c
- DEUTZIA CRENATA.**—Double white flowers in June.
3 to 4 feet 50c
- GOLDEN ELDER.**—Its golden yellow leaves contrast beautifully with the other shrubs. Flowers white, in flat-topped cymes. Grows naturally 10 to 15 feet, but can be pruned into a neat, compact little bush.
2 to 3 feet 50c
- ELDER PUBENS.**—A tall growing shrub that blooms very early in spring. The blooms are white, much resembling the common snowballs, and are followed by bright scarlet berries that are very ornamental.
3 to 4 feet 50c
- ELDER AMERICAN.**—Immense flat topped cymes of white flowers in early summer; followed in August and September by luscious black fruits—the source of Mother's "Elderberry pie."
2 to 3 feet 50c
- FORSYTHIA.**—(Golden Bell.) A tall growing shrub, producing bright yellow flowers before leaves appear in spring.
2 to 3 feet 50c
- HYDRANGEA PANICULATA GRANDIFLORA.**—Well known shrub, with immense panicles of pure white flowers in August.
1½ to 2 feet 35c
2 to 3 feet 50c
- H. ARBORESCENS GRANDIFLORA.**—(Hills of Snow.) Dwarf grower, producing flowers similar to the well known Snowball, at intervals from July to September.
1½ to 2 feet 35c
2 to 3 feet 50c

LILAC PURPLE. —Well known old-time shrub valued for its beautiful purple flowers.	
2 to 3 feet	50c
PHILADELPHUS. —(Mock orange.) Large sprays of single, sweet scented flowers in June.	
2 to 3 feet	50c
SNOWBERRY RED. —Small pink flowers followed by red berries that hang throughout the winter.	
2 to 3 feet	50c
SNOWBERRY WHITE. —Similar to the above variety except that the berries are much larger and are pure white in color.	
2 to 3 feet	50c
SPIREA ANTHONY WATERER. —Dwarf growing, with crimson blooms from June until September.	
12 inch	50c
S. AUREA. —Valued chiefly for its yellow foliage which turns to bronze in fall. Flowers white changing to red.	
2 to 3 feet	35c
3 to 4 feet	50c
S. VAN HOUTTEL. —The most popular variety of the species. The small, single white blossoms in clusters completely cover the foliage in early June.	
2 to 3 feet	25c
3 to 4 feet	35c
SNOWBALL COMMON. —White balls of bloom that usually help "fill out" on Decoration Day.	
1½ to 2 feet	60c
WEIGELA ROSEA. —Large, bell-shaped, rose colored flowers in June.	
2 to 3 feet	50c
WEIGELIA VARIEGATED. —Foliage prettily marked white and green. Flowers in light pink.	
1½ to 2 feet	50c

Hedge Plants

BARBERRY JAPANESE.—Dwarf growing, uniformly bushy and rounded in form. This is probably the most valuable shrub where a beautiful foliage is desired. It is especially useful for foundation plantings or as a filler in front of taller shrubs. Used as a hedge it makes a low, compact, impassable barrier of green, bronze or crimson, according to season. Considered the hardiest and most beautiful hedge plant for the North. We have a bushy, special hedge size, just 12 inches at \$10.00 per 100; 15 to 18 inches, \$15.00 per 100.

Heavy specimen plants for foundation planting.

18 to 24 inches	20c each
2 to 2½ feet	25c each
2½ to 3 feet	35c each

AMOR RIVER PRIVET.—Similar in form to the above, but a better grower and hardier.

12 to 18 inches	\$ 8.00 per 100
15 to 18 inches	10.00 per 100

CALIFORNIA PRIVET.—A variety of unusual beauty that bears shearing to any shape.

12 to 18 inches	\$ 5.00 per 100
13 to 24 inches	7.00 per 100

IBOTA PRIVET.—Spreading grower, completely covered with white flowers in June. Very hardy.
18 to 24 inches 15c

Ornamental Vines

ARISTOLOCHIA SIPHO.—(Dutchman's Pipe). A strong growing vine with immense leaves and queer-shaped brown flowers.

Heavy, 2-yr. \$1.00 each

BOSTON IVY.—About the only vine that will cling to the smoothest surface of walls, etc. 2-yr., 50c.

CLEMATIS PANICULATA.—Small, pure white, fragrant flowers, which completely cover the vine in September. 2-yr., 50c.

C. JACKMANI.—Large flowering, velvety purple, 2 yr., 75c.

C. MME. EDOUARD ANDRE.—Large flowering. Color a distinct crimson. 2-yr., 75c.

WISTERIA.—A rapid grower for pergolas or porches. Blue flowers. Clusters about 12 inches long. 2-yr., 75c.

Perennial Plants

We have a nice assortment of Perennial plants. We are quoting but a small part of our stock in this list.

AQUILEGIA.—Mixed colors, 20c each; \$2.00 for 12.

CHRYSANTHEMUMS.—Hardy, red, pink, white, yellow, 20c each.

DELPHINIUM.—Light blue and dark blue, 20c each; \$2.00 for 12.

DELPHINIUM.—Wrexham's Hollyhock strain, 50c each.

DIGITALIS.—(Foxglove.) White and rose, 20c each.

HIBISCUS.—(Giant Marvels.) Mixed colors, 20c each.

HOLLYHOCKS.—Double, mixed colors, 20c each; \$2.00 for 12.

PHLOX.—Large-flowering, in named varieties, 20c each.

PHLOX.—Subulata, dwarf pink, for borders, 20c each.

RED HOT POKER PLANT.—25c each.

SHASTA DAISY.—Tall white, 15c each.

YUCCA.—Filamentosa.—Heavy plants, 25c each.

If you want to plant Iris in the spring, send for our special Iris list.

Climbing Roses

Hardy varieties that will give you a wealth of bloom in mid-summer. Price, 50c each.

DOROTHY PERKINS.—Beautiful shell-pink.

WHITE DOROTHY PERKINS.—Pure white.

EXCELSA.—Radiant blood-red.

Japan Maples

We have, in limited supply, the true, grafted, red-leaved variety in small and medium size only. They are dug with ball and burlapped, and are priced at \$5.00 up, depending on size.

Hybrid Tea Roses

Two-year Field grown plants cut back ready for planting. 75c each, except as otherwise noted.

A selection of choice, well-known and new Garden Roses which, although classed as hardy, should be given winter protection. These types are popularly termed "Everblooming Roses." By this no one expects them to bloom continuously, but as compared with the Hybrid Perpetuals and other classes, their blooming activities extend over the longest period. As Garden Roses, they usually commence in June, continuing their bloom until autumn frosts suspend the flow of sap.

BETTY.—Coppery pink buds opening to a buff-pink.

BRITISH QUEEN.—Pure Ivory-white.

CHARLES K. DOUGLAS.—Flaming scarlet, flushed crimson, \$1.00.

ETOILE D. FRANCE.—Velvety garnet-red with crimson center.

GRUSS AN TEPLITZ.—Very bright scarlet.

J. J. L. MOCK.—Deep carmine-pink, with lighter center.

KILLARNEY.—Carmine-pink, mottled creamy white.

MME. CAROLINE TESTOUT.—Silvery-rose, deepening at center.

MME. ALEXANDRE DREAUX.—Bright coppery-yellow, \$1.00.

LOS ANGELES.—Flame-pink, shaded to coral and gold.

MRS. JOHN C. MENSING.—A deep, bright rose-pink, \$1.00.

PREMIER.—Brilliant, deep, dark pink.

RADIANCE.—Bright carmine-salmon, shaded red.

SOUV. DE CLAUDIUS PERNET.—Sunflower yellow, deeper toned at center, \$1.00.

WILHELM KORDES.—Golden-yellow, flushed with coppery-red, \$1.00.

WILLIAM F. DREER.—Shell-pink, with yellow at base of petals, \$1.00.

Special Rose Offer—For early orders, or so long as the varieties hold out, we will put up a collection, one plant of each variety as listed above, 16 plants in all, postage paid to any address for \$12.00.

Hybrid Perpetual Roses

Strong, 2-year field grown plants, cut back ready for planting, 60c each. The set of five postpaid for \$2.50.

FRAU KARL DRUSCHKI.—Large, waxy paper-like flowers in June; yielding their final outburst with the first snow of fall.

GEN. JACQUEMINOT.—(Jack Rose.) The old reliable, free blooming, rich crimson-scarlet.

GEORGE ARENDS.—Often called the Pink Druschki. Flowers are very fragrant and of a beautiful pink color.

PAUL NEYRON.—Flowers very large, 4 to 6 inches. Color a bright ruddy pink.

Ulrich Brunner.—Large, fragrant, with perfectly formed blooms of a bright cherry-red.

Evergreen Trees

We will have a fine lot of specimen evergreens to offer in varieties not listed. The value of many specimens differ so widely that we are unable in this small space to quote the different varieties and sizes. A visit to our grounds in planting time will enable you to select what you want at a fair price.

All of the following stock has been transplanted three or more times, and will be dug with ball and burlapped unless otherwise noted.

Evergreen Trees

Young stock suitable for lining out.

Many of our customers have asked us to quote prices on young evergreens for lining out. With small expense and plenty of time, this young stock will soon make fine specimens.

It is best to plant them in beds, giving them shade the first year. With ordinary care you can get a perfect stand.

50 plants at 100 rates; 500 plants at 100 rates.

Dahlias

Our Dahlia collection includes about 100 varieties best adapted for design and decorative work.

For lack of space we are naming but a few varieties representative of the entire list.

No broken necks or blind tubers sent out, but every tuber would be such as we would want to buy.

BONNIE BRAE —(Decorative) Very large ruffled flowers, peach-pink, shaded to creamy yellow	\$0.25
DUOZON —(Decorative) Large. A deep rich shade of orange red....	.15
DAINTY QUEEN —(Peony) The long petals are prettily incurved. Color, rosy lavender20
ETINDARD DE LYON —(Hybrid Cactus) Very large, with broad curling petals. Royal purple15
FLORADORA —(Cactus) Pure garnet, profuse bloomer15
FORDHOOK CERISE —(Peony) Rich cerise with a touch of orange at base of petals10
FORDHOOK WHITE —(Peony) A very very free blooming, pure white10
F. W. FELLOWS —(Cactus) Orange-scarlet flowers of a very attractive form25
GOLDEN GATE —(Cactus) Very large, orange yellow20
GOLDEN WEST —(Cactus) A rich golden bronze20
GRAND DUKE ALEXIS —(Show) Quilled white, with lavender tinge20
JACK ROSE —(Decorative) Dark velvety crimson10
KALIF —(Hybrid Cactus) A very good bright scarlet20
LA FAVORITA —(Cactus) Orange scarlet of fine form20
LILAC GEM —(Peony) Large, rosy-lilac15
MRS. JOHN GRIBBEL —(Peony) Pink with salmon shadings10
DREER'S YELLOW —(Show) A very fine quilled yellow10
PATRICK O'MARA —(Decorative) Rich orange buff20
PROFESSOR MANSFIELD —(Decorative) Variegated red, white and yellow20
D. M. MOORE —(Decorative) Very dark maroon25
VENUS —(Decorative) Very profuse bloomer. Lavender-pink25
COLLECTION NO. 1 —One tuber of each of the above 21 varieties, each variety properly labeled, will be mailed to any address, prepaid for \$3.00.	

Selected Dahlias

Of the following new and scarce varieties we are able to offer tubers and started plants as quoted. Our plants are really baby bushes, and will produce even better blooms than tubers at half the cost. Started plants ready June 1st.

	Tubers	Plants
	each	each
EMMA MARIE —(Cactus) Clear pink with creamy center	\$1.00	\$0.50
JANE COWL —(Decorative) A giant bloom with buff and old gold blending to a bright salmon at the center		5.00

 2 year plants, 35c each \$3.00 for 10

White Varieties

DIAMOND—An extra early white grape of the best quality.
 2 year plants, 35c each \$3.00 for 10
NIAGARA—The leading white sort. Bunch large, berry large, yellowish white, and of good quality.
 2 year plants, 35c each \$3.00 for 10
SPECIAL—Concord seconds for vineyard planting, \$50.00 per 1000.
 Niagara seconds, \$65.00 per 1000, while they last.

Asparagus

100 plants will supply a family with this health-giving vegetable. When once planted it will last for a life-time.
STANDARD VARIETIES—2 year roots, 30c per 10 \$1.50 per 100

Rhubarb

Unequalled for sauce and pies in early spring. 10 Plants will give you an ample supply.
MAMMOTH LINNAEUS—An early, tender variety, with a mild, sub-acid flavor.
 Large roots, 20c each \$1.50 per 10

Strawberries

Everbearing Varieties

MASTODON—A new variety praised by all who are growing it.

The berries are very large, well colored and bear on the young plants or runners as well as the "mother" plant. A wonderful improvement over all other bearing varieties.

Price per dozen, 50c \$2.50 per 100

June-Fruiting Varieties

HOWARD NO. 17—Large, firm berry of delicious flavor. Long season.

Productive and fine for either home use or market.

Price, \$1.00 per 100 \$9.00 per 1000

✓ **PARKER**—Another season has demonstrated the fact that it pays to grow only fancy Strawberries. The berries of Parker are uniformly large, and the fact that the demand by planters has kept the price high shows that it has been paying better to fruit Parker than to sell the plants. We are now offering Parker at less than the usual price.

Prices, \$2.00 per 100 \$15.00 per 1000

Black Raspberries

Prices, 50c per 10; \$3.00 per 100 \$25.00 per 1000

CUMBERLAND—A mammoth mid-season variety of fine quality. Berries very large and firm.

Red Raspberries

LATHAM—Originated in Minnesota and growers in that state are discarding many of the older standard varieties in its favor. The berry is of immense size and the canes bend almost to the ground with their enormous load of fruit. Dark red in color; very large.

Prices, 75c per 10 \$5.00 per 100

Blackberries

Prices, 50c per 10; \$3.00 per 100 \$25.00 per 1000

ELDORADO—Berries large, brilliant black, borne in large clusters and ripen well together.

MERSEREAU—Large, richly flavored berry of extra fine quality. Intense jet-black.

Currants

Prices, 2-year, No. 1, 20c each; \$1.50 per 10; \$10.00 per 100 except if otherwise noted.

CHERRY—Fruit large size, deep red, rather acid, borne in short bunches.

FAY'S PROLIFIC—The leading market variety. Extra large and uniform stems and berries; easily picked.

PERFECTION—Beautiful, bright red, holding its large size to end of bunch; easy to pick; a superior bearer, less acid and of better quality than any other large currant in cultivation. 25c each.

WILDER—Bunch and berry large; of bright red color, mild sub-acid flavor, and of excellent quality.

WHITE GRAPE—Clusters long; berries large. Attractive of mild flavor and good quality.

Evergreen Tree Seed

Many of our customers have asked us to furnish them with evergreen tree seeds, and to accommodate them we will fill orders from the stock reserved for our own use, but orders must be sent in early. The varieties quoted are all in demand and will prove profitable.

Seed should be shown in early spring in well prepared beds, and should be shaded the first summer.

	Per Pound
BLUE SPRUCE—Selected from true-blue trees	\$7.50
NORWAY SPRUCE—Collected from highest elevations	3.00
CONCOLOR FIR—The true Colorado variety	4.00
MUGHO PINE—The many-stemmed dwarf strain	7.50
AMERICAN ARBOR VITAE—Seed collected from northern sources..	6.00

EXTRA SPECIAL—We will mail you one-fourth pound of each of the above five varieties, prepaid for \$7.00.
